Drawrolls

Drawrolls play a crucial role in proper, consistent bag formation and cutoff. Proper print registration is also dependent upon drawroll function.

To ensure optimum bag machine production, periodically check drawrolls for wear and replace as needed.

Several styles of drawrolls are available to meet your converting needs.

Knurled (Herringbone pattern)

An H.G. Weber standard for paper converting. The knurled texture ensures proper grip as paper is drawn from the rollstands toward the cutoff.

Plasma-Coated

Non-marking drawrolls designed for delicate print jobs or coated materials.

Composite

Designed for film or film-coated paper converting. Provides proper grip without marking material.
