## **DRUM FINGER SPIDER**

Has This Ever Happened To You?

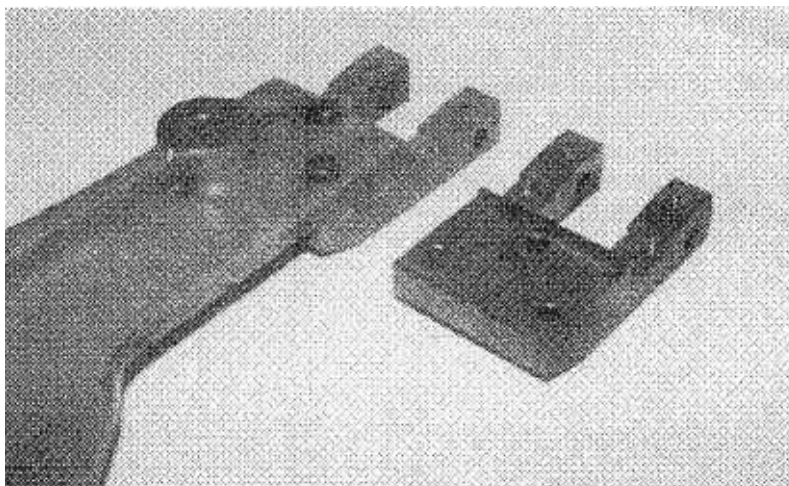

Have you lost valuable production due to expensive downtime caused by a broken drum finger spider?

H.G. Weber now offers you a drum finger spider with replaceable drum fingers...saving you:

Replacement costs.

Valuable production time otherwise lost while waiting for a replacement.

Repair costs.

Updated drum finger spider and replaceable finger.

Have you ever had a drum finger spider break and lose one, two or more days of production...just because you had to wait for a drum finger spider replacement? A drum finger spider is expensive, and it is not very common to carry a back up unit in stock. A replacement unit is only a phone call away, and we would ship it air freight, but we have a better idea!

We have designed a drum finger spider with replaceable finger carriers. Then if a drum finger should break, instead of pulling the entire drum assembly, you can easily replace just the finger carrier while the unit is still on the machine...saving you valuable production time, replacement and repair costs. For example, replacing the older style drum finger spider could result in 3 to 4 days lost production. Once the new replaceable finger design has been installed in your bag machine, it would only take a short time to replace a finger carrier!

How can you get one of these new spider units? Most likely you have a broken spider unit laying around. We can re-machine that broken unit into the new design, complete with finger carriers. Then once installed, if a finger carrier should break, the replacement cost is only the price of a finger carrier.

How good is this new design? The same simplicity in design and use of quality materials that goes into everything we make, is incorporated in the new unit. Only three easy-to-reach screws hold each finger carrier in place. In fact, this new design has the same close tolerances as a new one-piece unit. Be sure to include your machine's model and serial numbers with your inquiry. The new style drum finger spider is available for all Weber variable size bag machines.
