

SERVICE BULLETIN

Screw-Lift Rollstand with Automatic Center Web Tension Control

- ◆ Screw-lift feature assists the operator in the removal and installation of rolls.
- ◆ Air-operated dancer roll system
 - Automatically adjusts braking system to provide consistent web tension from full roll to core
 - Reduces web bounce
- ◆ Web tension is not affected by roll density.
- ◆ Air brake system located on the spindle instead of the roll is more tolerant of “out-of-round” rolls.
- ◆ Accepts a wide range of papers and basis weights.
- ◆ Removes the need for a drag belt—will not scuff delicate print jobs or coated materials.

Pneumatic brake applies pressure to the spindle maintaining consistent web tension regardless of roll quality or diameter.

Photo shown without guards. All guards must be in place before operation.
