

## WEBER/OLM FILE FOLDER MACHINE

Consider the Weber/Olm File Folder Machine for efficient production of legal and letter size file folders. Equipment is available in either sheet fed or roll fed models. Both models are equipped to score, tab cut, fold and produce single or double top tab folders.

The Model ORF cuts roll stock of variable sheet lengths and forms complete folders.

The Model OSF forms file folders from precut sheets. This model can be converted to an ORF at a future date by adapting the cutting head and rollstand.

The optional rotary tabbing unit may be added to either model, offering more efficient tab cutting. Optional inline flexographic printing presses are also available.

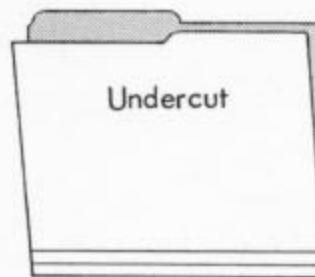

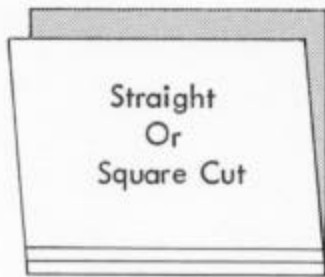

### RANGE SPECIFICATIONS

Roll Diameter, Maximum	60"	1525 mm
Web Width, Maximum	15½"	395 mm
Roll Feed Cutoff Length	17 to 22"	430 to 560 mm
Stock Thickness	.008 to .018"	.2 to .5 mm
