

## **SERVICE BULLETIN**

00-4

### **Rollstand with Automatic Web Tension Control**

*For Increased Bag Production  
and Improved Bag Machine Operation*

- ◆ Air-operated dancer roll system
  - Automatically adjusts braking system to provide consistent web tension from full roll to core
  - Reduces web bounce
- ◆ Web tension is not affected by roll density.
- ◆ Air brake system located on the spindle instead of the roll is more tolerant of “out-of-round” rolls.
- ◆ Accepts a wide range of papers and basis weights.
- ◆ Removes the need for a drag belt—will not scuff delicate print jobs or coated materials.

#### ***Bag Machine Operation Improvements include:***

*Consistent slit lengths*

*Consistent interply paste dot location*

*Consistent cutoff registration, reducing center gripper misses*

*Contact the H.G. Weber Service Department at 920-894-2342.*
