## Single Size Bagmaking System

*High-Speed Total Automation  
from Roll to Bundle*

Converting *your* ideas

# 800 Series Single Size Bag Machine

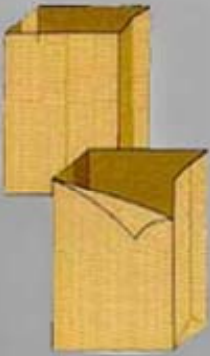

- ◆ High-speed performance with continuous trouble-free operation
- ◆ Converts fixed size, 1-ply bags
- ◆ Inline printing available

High-speed performance and consistent bag quality are two trademarks of the 800 series single size bag machine.

A wide range of machine sizes produce self opening style (S.O.S.) 1-ply bags. Sizes range from two pound bags to supermarket checkout bags. These bags are popular at fast food restaurants, grocery stores, and drugstores.

Operating at high speeds, the single size bag machine stands up to the most demanding production schedules whether running plain or preprinted stock (with optional servo drive). Add an inline printing press to produce your own high-quality graphics.

## SPECIFICATIONS

Model	Width		Bottom		Bag Length		Cut Length		Bag Size
	(in)	(mm)	(in)	(mm)	(in)	(mm)	(in)	(mm)

- ◆ Consult H.G. Weber sales personnel to verify specifications for servo driven models.

**PLEASE NOTE:** Additional ranges may be available upon request. Contact your sales representative to discuss specific bag sizes.

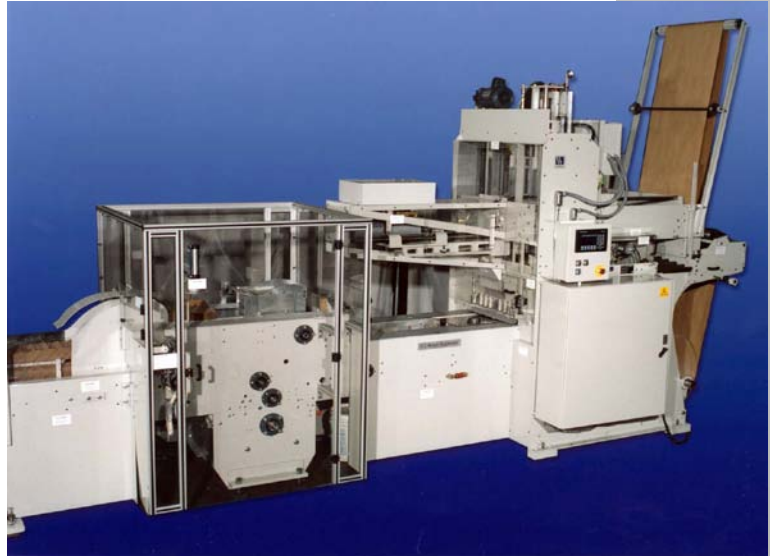

# 900 Series Bagtender

- ◆ Automatic collating, bundling and wrapping
- ◆ High-speed performance
- ◆ Fully automated operation

The 900 series bagtender transports, accumulates, and wraps stacks of bags into tight and uniform bundles, ready for shipment.

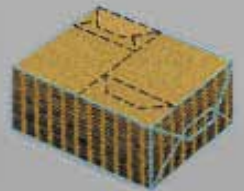

As stacks of bags leave the bag machine, they are pressed and turned, alternating the bag bottoms for even stacking. A conveyor transports the stacks to the bundling section.

Stacks are counted as they gather in the accumulator. They are compressed into counts of 250, 400, 500, or 1000 bags. Custom counts are also available. These compressed stacks are then wrapped, with or without the ends sealed.

# STANDARD FEATURES

## 800 SERIES BAG MACHINE

- ◆ Digital production tachometer/bag counter
- ◆ Variable discharge seam adhesive pump
- ◆ Non-rotating handwheel (spring operated)
- ◆ Fully guarded
- ◆ Automatic oilers on main gear drive
- ◆ Hard coated formers and gusset plates
- ◆ PLC controlled electrical
- ◆ Automatic small roll detection and stop  
(with *H.G. Weber rollstand*)
- ◆ Web break detection with auto machine stop

## 900 SERIES BAGTENDER

- ◆ PLC control: 1 function
- ◆ Fully guarded
- ◆ Orbital wrapper cutoff (incorporates utility knives for sweeping cutting action)
- ◆ Cross paste rodless cylinder system

# OPTIONAL FEATURES

## 800 SERIES BAG MACHINE

- ◆ Servo driven feedrolls
- ◆ Roll unwind with motorized roll lift  
(60" maximum roll diameter)
- ◆ Auto web tensioning system for roll unwind
- ◆ Automatic web aligner system
- ◆ Automatic seam glue alignment system
- ◆ Additional parts to run side seam
- ◆ 90-degree gear box (required for driving inline equipment [example: printing press])
- ◆ Inline flexographic printing (1-4 colors)
- ◆ Opposite hand machine

## 900 SERIES BAGTENDER

- ◆ Wrapper end fold and sealing system
- ◆ Motorized wrapper roll lift
- ◆ Independent motor drive (allows independent bagtender operation)
- ◆ Bag delivery stacker

Our customer service team provides intensive operator training, technical support and service throughout the life of your investment. Call on us to help you choose the single size bag machine system that will fulfill your bag making needs now and into the future.

Machine guards are provided for your safety and protection. To avoid the possibility of serious personal injury, all guards **MUST** be in place and functioning properly before machine operation.
